**CHOOSING  
THE  
RIGHT  
PAD**

REFLEXON PADS

REFLEXON Pads are made with **NATURAL FIBERS** and polyester **HOGGS HAIR** to outlast many other competitors. REFLEXON was designed for a more effective finish when frequently used. REFLEXON has a very bright "wet-look" shine with soft to medium finishes. Using this pad 3-4 nights per week will not effect it's uniqueness. Made with synthetic and natural fibers, it was designed for burnishing with a remarkable gloss. REFLEXON's synthetic, non-aggressive pad will remove black marks and create a high gloss simply because of the rubberized coating needed to repair softer finishes. This Ultra High Speed Burnishing & Spray Buffing Floor Pad is constructed to last under extreme amounts of wear. The REFLEXON design stops the elongation and resulting destruction of the pad caused by centrifugal force. For less clogging in heavy build-up situations, **CUTTING EDGE** works to strip down tile to bare floor.
