

Sanding Products for the Wood Floor Professional

DBZ DIAMONDBACK (Blue) 900-1000sq. ft.

- High percentage Zirconium mineral makes very fast consistent cut
- Belts last 2 to 3 times longer than other minerals.
- Less Belt Changes + Less Down Time = More Profits
- Heat Resistant durable cloth backing
- Don't confuse this with other blue look alike belts
- DBZ Belts are so tough they will sand through nail stick ups
- Lowest Cost Sandpaper to use per square foot
- Last 10 times longer than paper
- Sharpness of Silicon Carbide and more durable than Aluminum Oxide
- Learn to work with this belt and save thousands of dollars a year
- Use to remove ceramic and alumina finishes
- Available in grits 24,36,40,50,60,80,100,& 120

AOS ALUMINUM OXIDE (Red) 700-800 sq.ft.

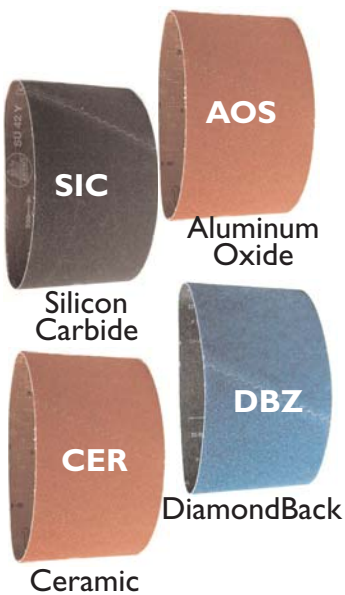

- Works longer than Silicone Carbide by about 20%
- Aluminum Oxide is more durable but doesn't fracture as easily making it great for most jobs (especially for a natural finish)
- Aluminum Oxide is the lowest cost belt we offer.
- Great for production work, widely used in the wood flooring industry
- Pure economics, low cost and longer lasting
- Available in grits 16,24,36,40,50,60,80,100,120,& 150

SIC SILICON CARBIDE(Black) 500-600 sq.ft.

- Brittle mineral fractures easily when loaded creating a new sharp edge. Cuts fast ,starts and stays sharp
- 12-36 grit removes old gummy finishes, waxes, paint and fractures at low pressure allowing the belt to clean itself.
- 40-60 grit for leveling and removing deep scratches.
- 80-120 grit for fine finishes
- Best for fine finish, dark stains, pines and very hard species
- Widely used on wood floors and fine wood throughout the furniture industry
- Available in grits 16,24,36,40,50,60,80,100,120,& 150

CER CERAMIC (Red/Orange) 900-1000 sq.ft.

- An exceptionally hard, extremely aggressive, strong, sharp abrasive. Ceramic has the ability to fracture and create a new sharp edge. Long lasting and durable.
- Sharpness of Zirconium and longer lasting than Aluminum Oxide
- Used on gym floors, racquetball courts and large wood floors
- Grits available: 24, 36, 40, 50, 60, 80, 100, & 120

BELTS DiamondBack Abrasives were developed specifically for the Wood Flooring market. Designed with all cloth backing & two resin bond, offering maximum mineral adhesion. FEPA "P" grading, the most stringent grading system in the world, insures that 95%+ grit is exactly as specified to provide smooth consistent sanding. Add the Pro-Lock "Sine" splice with smooth low profile insures alignment and eliminates hinging, like that of a straight splice, while allowing the belt to be used non-directional providing the consumer with the "best belt you can buy." **All belts are available in any Mineral. Custom sizes are no problem.**
