

EDGER DISCS **SIC** Silicon Carbide Paper (Black) is the sharpest fastest cut. Heavy weight paper backing standard throughout the industry. Tear and load resistant. Cuts fast with a good finish. Best pricing in the industry. Brittle mineral fractures easily when loaded creating a new sharp edge.

DBZ DiamondBack Cloth (Blue) This extremely hard mineral offers prolonged life normally 10 times longer than standard paper disc. Works well on pre-finished floors. Pure economy fewer paper changes - less labor more production reducing paper cost.

AOS Aluminum Oxide Cloth (Red) Lasts 5x longer than standard paper discs. Fewer paper changes reduces labor - increases production. Runs cooler protecting edger pads. Heavy Duty Cloth with double resin bond insures longer lasting disk. Cost about the same as paper.

DRUM PAPER ROLLS **SIC** Silicon Carbide Black Paper

Used for general drum sanding by Professional Sanders. Brittle mineral fractures easily when loaded creating a new sharp edge. Silicon Carbide is a very sharp mineral on paper backing. Tear resistant, load resistant, easy to cut. 12-36 grits great for gummy finishes, waxes and paint. 40-60 grits good for leveling and removing deep scratches. 80-150 grits for fine finishes. Silicon Carbide cuts fast, starts and stays sharp.

ROLL PAPER SILICON CARBIDE 8" & 12"- 50YD.

DRUM CLOTH ROLLS

High quality tear resistant extremely durable cloth backed abrasive rolls are great for large jobs i.e. gym floors and commercial buildings. With longer life and less changing allowing better productivity. Cloth with double resin bond prevents mineral loss while the abrasive cuts faster and runs cooler.
